TECHNICAL SKILLS:

ReactJS | Redux | JavaScript | ES6 | Git | HTML, CSS | SASS, SCSS | Node.js | MongoDB | Netlify | Babel

SOFT SKILLS:

Teamplayer | Paying close attention to detail | Client focused | High demands on the quality of work | Continuous integration

LAST PROJECTS:

1. **Portfolio page** – https://dreamy-kirch-868a5f.netlify.app
- Used Languages/Technologies/Environment: HTML5, ES6, SCSS, Javascript, React, Git, Netlify
- Topics I learned: advanced topics in Javascript, and such topics in React as Components, Props, State, Lifecycle, Events Handling, Hooks, Forms, React Routing etc.
- Project type – solo
- Destination/purpose – demonstration of acquired knowledge and skills during the course and creation of my own website where I can talk about myself and show my projects.

2. **Restaurant Finder** – https://priceless-galileo-680738.netlify.app
- Used Languages/Technologies/Environment: HTML5, ES6, SCSS, Javascript, React, Redux, Git, Netlify
- Topics I learned: data fetching from the API, Redux, Dynamic Routing
- Project type – team project (two developers)
- Destination/purpose – this app helps to find and filter restaurants based on different requests. For example, to find a middle-range Italian restaurant that is open now and also serves lactose-free dishes.

WORK EXPERIENCE

WEB DEVELOPER (HTML/CSS/JS)
Freelance | MAR 2014 - NOV 2015, NOV 2017 - DEC 2019 (occasionally)

Used Languages/Technologies/Environment: HTML5, CSS3, JavaScript, jQuery, Git, SCSS

I created pixel-perfect, dynamic and responsive Websites, such as online stores, magazines, as well as personal and business Websites. I used HTML and CSS/SCSS for layout. Also I used BEM methodology for independent blocks development. For dynamic content like image carousels and popups, I used Javascript and jQuery.

Collaboration with several customers taught me team play, customer focus and time management. Also I learned how to work under the time pressure.

JUNIOR WEB DEVELOPER (HTML/CSS)
Freelance | FEB 2014 - MAR 2014

Used Languages/Technologies/Environment: HTML5, CSS3, Git

I worked as an assistant to a more experienced Web Developer-Freelancer, where helped to create simple independent markup blocks using CSS and HTML, which then was pieced together into large projects and sent to the customer.

Here I found out what pixel-perfect and BEM methodology are. In this job I learned attention to detail, teamwork and responsibility for quality.

EDUCATION

REDI SCHOOL – REACT

Berlin | FEB 2020 - JUN 2020

In this school I learned advanced topics in Javascript, and such topics in React as: Components, Props, State, Lifecycle, Events Handling, Hooks, Forms etc.

During this course I created two projects: a Portfolio and a Restaurant Finder.

The Portfolio was a solo project, done with Javascript, React and SCSS.

The Restaurant Finder was a team project during which we learned to develop apps with dynamic content. Here we learned how to fetch the data from the API, applied React Routing and Redux. I came up with all the design and styles myself. For the styling I used SCSS.

Here is Portfolio – https://dreamy-kirch-868a5f.netlify.app
Here is Restaurants Finder – https://priceless-galileo-680738.netlify.app

WTM BERLIN – JAVASCRIPT CRASH COURSE

Berlin | OCT 2019 - NOV 2019

Javascript course with focus on programming paradigms, Node ecosystem, asynchronous programming and using MongoDB as a data storage.

LERNWERKSTATT – WEB DEVELOPMENT FOR ALL

Berlin | MAR 2018 - OCT 2018

Die Lernwerkstatt is an offline learning platform in Berlin.

At the end of the course I was involved in the development of the online Lotto game – https://lernwerkstatt-lottogame.azurewebsites.net

RU.HEXLET.IO

2017 - 2018

Here I covered deeper understanding of Javascript paradigms, created apps at a more abstract level of JS ecosystem using npm.

At the end of the course I finished the project "Mind Games" – https://github.com/atranarta/project-lvl1-s412, which meant creating 6 simple console games.

HTMLACADEMY.RU

HTML, CSS | DEC 2013 - FEB 2014

In this intensive course I learned the basic concepts of HTML and CSS and learned how to create simple Websites (there were 3 projects in the course).

MSC IN MARKETING

Khmelnytskyi National University – Khmelnytskyi, Ukraine | 2007 - 2012
